Profile Summary

Dedicated React.js Developer specializing in web development with a proven track record of creating dynamic and interactive websites. I possess a deep understanding of modern front-end technologies and a passion for crafting seamless user experiences. My expertise extends to developing robust and efficient React.js applications, prioritizing performance and scalability. As a driven individual, I am committed to leveraging my technical skills to drive innovation and deliver exceptional software solutions.

EDUCATION

Bachelor's Degree in Software Engineering

Egyptian Chinese University, Cairo, Egypt (Oct 2019 – June 2024)
- **Total GPA:** 3.52

Professional Experience

- **UI/UX Designer -** Egyptian Chinese University, Cairo, Egypt (July 2021 - Aug 2021)
  - Gained practical experience in UI/UX design, focusing on creating user-friendly and visually appealing web application interfaces.
  - Worked on design projects, applying design principles to improve user experience and usability.

  - Gained practical experience in web development using React.js, building dynamic and responsive web applications.
  - Worked on optimizing website performance, implementing real-time features, and ensuring a seamless user experience
- **Software Engineer -** The Egyptian Air, Cairo, Egypt (Aug 2023 - Sep 2023)
  - Developed and optimized software solutions for operational management systems, improving system efficiency and performance.
  - Collaborated with teams to integrate new features, troubleshoot issues, and enhance overall system reliability.

PERSONAL SKILLS

- Quick learner
- Creativity
- Adaptability
- Leadership
- Collaboration & Team Work

SKILLS

- **Frontend Development:**
  - React.js (including Hooks and Context API)
  - HTML5
  - CSS & CSS3
  - JavaScript (ES6+)
  - TypeScript
  - Bootstrap
  - Tailwind CSS
  - jQuery
  - Redux Toolkit
- **Backend Development:**
  - Python
  - Django
  - API Integration
- **Version Control:**
  - Git

Projects

- **E-Learning Platform:**
  - **Frontend:** React.js, Tailwind CSS, Redux Toolkit | GitHub
  - **Data Fetching:** React Query, Json-Server
  - modern web application designed for learning and skill development.
- **E-Book Store:**
  - **Frontend:** React.js, Redux Toolkit, Tailwind CSS, React Icons | GitHub
    Interactive, fully responsive allows users to buy wide range of eBooks across various genres.
- **Movie-Hub:**
  - **Frontend:** React.js, Bootstrap, React Icons | GitHub
  - **Backend:** Django, Python, PostgreSQL
    Large modern website for movie enthusiasts to interact with each other.
- **E-commerce**:
  - **Frontend:** React.js, Tailwind CSS, Hero Icons, Redux Toolkit | GitHub
    Interactive, fully responsive e-commerce website.
- **Intelligent Campus Community Monitoring and Tracking System (Entry Eagle):**
  - **Frontend**: React.js, Tailwind CSS, Hero Icons | GitHub
  - **Backend:** Django, Python, SQLite | GitHub
    Entry Eagle is a system that uses facial recognition to enhance safety by tracking family and friends in real-time. It captures and processes facial images, sending the data to the backend for analysis and tracking. | GitHub
